## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1, 3-18 and 20-85 are allowed.
2. The following is an examiner's statement of reasons for allowance: Independent claims 1 and 18 have been amended to incorporate the limitation that the vanes are spaced approximately 5-25 mm apart, which is not disclosed in the prior art of record. Claim 35 is allowable because the prior art fails to disclose the apparatus wherein the shell and tubes are positioned at an angle of between about 30 and 60 degrees from a horizontal. Claim 39 has been amended to incorporate the limitation of desorbing the adsorbable substance from the adsorbent material in a batch or continuous process. Claims 54 and 70 are allowable because the prior art fails to disclose or suggest a motivation for having at least two adsorbent flow channels in the claimed device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Specification***

3. The disclosure is objected to because of the following informalities: Each of the changes requested in paragraph 9 of the previous office action must be addressed in addition to the following issues: In claims 1 and 18, the status identifiers must be changed to "currently amended" or "previously presented" and not "original". In line 3 of claim 8, a closing quotation mark is required for the "V". The amendment made to the specification in the response of July

Art Unit: 1724

29, 2005 must be reversed because it is not consistent with the claims. In section D of claim 39, “th egroup” should be changed to “the group”.

Appropriate correction is required.

4. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The angles recited in claims 4, 5, 10, 11, 21, 22, 27, 28, 57, 58, 62, 63, 73, 74, 78 and 79 do not have basis in the specification. These limitations may be added at line 22 of page 14 (vane slope angles) and at line 17 of page 13 (angle between the flow channels) to overcome this objection.

#### ***Drawings***

5. The drawings were received on July 29, 2005. These drawings are approved.

#### ***Conclusion***

6. This application is in condition for allowance except for the following formal matters:

The objections to the specification detailed in paragraphs 3 and 4 above must be corrected. Please ensure that the corrections requested in paragraph 9 of the previous office action are also made.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
